

[ebm-papst in Australia and New Zealand](#)

Our principle is being close to our customers, our passion is always being one step ahead.

ebm-papst Australia Pty Ltd distributes world leading fans and motors of its German parent company to the Australasian market.

Because of the above-average growth in the last few years the Head Office in Melbourne moved into a new 2,000 square meter purpose built premises, located in the industrial area Laverton North. Since the relocation in November 2007, there are 22 employees who support customer demands and are striving to find the perfect solution for every application. The increased warehouse can handle the new AC and EC giants as well as arise stock in existing products.

ebm-papst Australia's expertise is concentrated in 3 spheres:

- Maximizing the performance of customer's products by working with designers to correctly apply ebm-papst products - Local test facilities are a no-charge benefit to customers in this process.
- Co-ordinating between customers and the factory to ensure products are designed to suit the customer's requirement - Many products are purpose built.
- Working closely with customers to ensure adequate stock is available and delivered exactly when it is required - Many customers have Kan Ban just in time requirements.

The brand name ebm-papst is synonymous with technological advancement in motor and fan development
