

Soanar to distribute ebm-papst compact fans and drives

ebm-papst A&NZ has agreed and appointed Soanar as a distributor of its compact fan and motors and drives products.

Soanar is a 100% privately owned company founded in 1963 with over 45 years of experience manufacturing and distributing electronic components, embedded systems and related products. Soanar's headquarters are in Sydney where a team of over 150 staff operates from offices located throughout Australia, New Zealand, Singapore, Malaysia, Thailand, India, HongKong & China. Soanar's logistics is networked across Asia from warehouses in Sydney, Auckland and Singapore.

Soanar Specialises

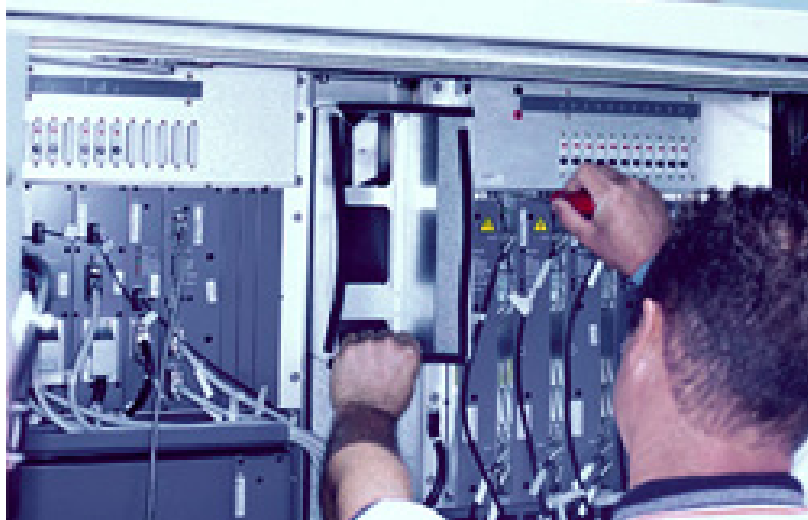

Together with ebmpapst and the technical support provided, Soanar does more than just distribute components. Soanar has specialist product and marketing groups for ebm-papst product which are set up to address specific Customer and Product requirements.

Soanar services include:

- Field Application Engineering Support
- Device Programming
- Sub-assembly Capabilities
- Custom Power Supply Solutions
- Custom & Intelligent Cable Assemblies
- Environmental Conditioning
- Custom LCD Displays
- Embedded System Design & Integration
- Touch Screen Integration
- Supply Chain Solutions
(VMI, Kan-Ban, Consignment & In-Plant Store)

From design to fulfilment, Soanar strives to deliver the latest and most cost effective fan and motor solutions to customers.

ebm-papst fans are used in cooling units for control cabinets.

Using S-Force and AC Maxx technologies in the telecommunications and electronics markets sectors, Soanar engineers are providing flexible modular systems specially developed to reliably fulfil higher cooling requirements. Working together, Soanar and ebm-papst engineering teams are working with companies in both Australia and New Zealand to improve their engineered systems.
