# VARIODRIVE

## VARIODRIVE Compact

### Technical Information

#### VARIODRIVE

VARIODRIVE offers you the extensive power range and dynamics of a modern EC drive with a price-performance ratio that has so far been deemed inconceivable. The motors and motor electronics of this product line originated essentially from the basic elements of the renowned ebm-papst DC fans. Production processes and material procurement profit from the millions of fans produced. This formed the basis for 5 sizes of 1- and 3-phase EC external rotor motors in an extensive performance range.

With high operating efficiency – in other words – with low energy consumption and high motor performance, these motors are a convincing solution, offering a wide speed range and excellent control characteristics. High torque constancy, no vibration and virtually noiseless running are further advantages of these motors.

#### VARIODRIVE Compact

This is total integration – with a 3-phase electronically commutated DC motor and the control electronics all in a single package: Unrivalled in this performance class. The extremely compact drive unit with microprocessor-controlled motor manager and FET power stage has an internal closed-loop speed control compatible with all standard industrial interfaces. This means: just connect it up and off you go!

VARIODRIVE Compact is ultraflexible. The motor can be speed controlled and the desired speed selected via a set value voltage. Via 2 control inputs the direction of rotation can be selected, the motor can be enabled or a motor brake function can be activated. An open collector frequency output for monitoring the actual speed is also available.

#### Data and facts VARIODRIVE

- 1- and 3-phase external rotor motors in 5 different sizes.
- EC technology for long service life and silent running.
- Power range: 3 to 100 Watt.
- Precision ball bearings.
- Spur gears in different gear reduction stages for a variety of applications.

#### Data and facts VARIODRIVE Compact

- 3-phase, electronically commutated external rotor motor.
- Excellent control response over the entire speed range due to digital 4-Q PI controller.
- High operating efficiency due to FET power stage and special control process.
- Excellent speed stability, silent running, long service life.
- Motor manager: Safe operation in all working point by speed-dependent current limiting and by stall protection pulsing.
- ACTUAL speed output.
- Motor electronics optimally adapted to motor characteristic.
- Spur gears and planetary gears in different gear reduction stages for a variety of applications.
- Winding insulation as per insulation class E.
- Standard protection class IP 00, for VDCS-3-54.14 and VDC 3-54.32 in IP 40.
- Customer-specific winding layout and motor part sets available on request (e.g. fixed speed, direction of rotation).

# Contents

The 1- and 3-phase brushless outer rotor motor design has proven its reliability in millions of ebmpapst fan products. Based on this quality and experience VARIODRIVE and VARIODRIVE Compact motors offer excellent speed stability, silent running and a safe and long service life.

## Commutation

The following diagram illustrates the sequence of the Hall signals and the corresponding drive sequence with the relevant colours and / or pin assignment that apply to self-developed products and / or to purchased electronics. It also illustrates the phase position of these signals to the induced motor voltage.

### Commutation sequences

#### Commutation sequences

Chronological signal sequence of integrated Hall sensors (= RLG) at the corresponding connections.

#### VARIODRIVE

##### Position

3

4

5

#### Switching sequences of the power output stage

Required relationship between the signal change from RLG and the relevant change for the switching status of the power transistors in relation to the phase lead to the motor.

6

7

8

#### Induced voltages

Idealized illustration of the sequence of the induced voltages between the relevant connections.

Notation

# VARIODRIVE-Motor

VD-1-27.08

- 1-phase, 2-core reluctance motor as external rotor version.
- EC technology.
- Dynamically balanced rotor with 4-pole, plastic-bonded ferrite magnet.
- Determination of rotor position via Hall sensor.
- Commutation electronics fully integrated in the motor.
- Load-dependent speed setting via connection voltage.
- Customer-specific winding layout and / or motor part sets available on request.

# VARIODRIVE Compact-Motor

VDC-3-43.10

- 3-phase external rotor motor in EC technology.
- Dynamically balanced rotor with 4-pole, plastic-bonded ferrite magnet.
- Integrated operating electronics with powerful microcontroller.
- Excellent control response due to digital 4-Q PI controller.
- High operating efficiency due to FET power stage.
- Analogue set value.
- Operating mode selection (direction of rotation, braking and motor enable) via 2 control inputs.
- Protection against overload due to integrated, speed-dependent current limiting.
- Customer-specific version possible based on software and hardware adaption (e.g. fixed speed, direction of rotation).

**3. Set value**

Speed setting for speed control via set value voltage (interface 0 ... 10 V DC).

For detailed information, please refer to the corresponding specification data sheets. The instructions and safety notes in the operating manual must be kept at all times.

# VARIODRIVE Compact-Motor

VDC-3-54.14

- 3-phase external rotor motor in EC technology.
- Dynamically balanced rotor with 4-pole, plastic-bonded ferrite magnet.
- Integrated operating electronics with powerful microcontroller.
- Excellent control response due to digital 4-Q PI controller.
- High operating efficiency due to FET power stage.
- Analogue set value.
- Operating mode selection (direction of rotation, braking and motor enable) via 2 control inputs.
- Protection against overload due to integrated, speed-dependent current limiting.
- Customer-specific version possible based on software and hardware adaption (e.g. fixed speed, direction of rotation).

## Nominal Data

Type		VDC-3-54.14	...620

- Analogue set value.
- Available in various reduction ratios.
- Motor mass 1.39 kg.

Nominal Data	Gear ratio	Nominal torque	Speed range	Order No.
Type	i	Nm	min <sup>-1</sup>	
VDC-3-54.32-D 9	9.2 : 1	2.0	38 ... 330	947 5432 610
VDC-3-54.32-D 18	18.4 : 1	3.5	19 ... 163	947 5432 611

### Gear type D

Multi-stage spur gear in zinc diecast body.  
 Grease lubrication for maintenance-free continuous operation.  
 Shaft output with combined sleeve / needle bearing.  
 Reversible direction of rotation.

Color	ACTUAL	ACTUAL Speed value
White	A	Input A
Grey	B	Input B
-	C	Not connected
Green	S+	Set value
-	S-	Ground set value
Black	GND	Ground
Red	+Ub	Supply voltage

# VARIODRIVE Compact

Gear motor VDC-3-54.32-E

- 3-phase external rotor motor in EC technology for gear applications.
- Dynamically balanced rotor with 4-pole, plastic-bonded ferrite magnet.
- Integrated operating electronics with powerful microcontroller.
- Excellent control response due to digital 4-Q PI controller.
- Analogue set value.
- Available in various reduction ratios.
- Motor mass 1.48 kg.

Nominal Data	Gear ratio	Nominal torque	Speed range	Order No.
Type	i	Nm	min <sup>-1</sup>	
VDC-3-54.32-E 31	31.1 : 1	5.9	11 ... 97	947 5432 620
VDC-3-54.32-E 70	70.4 : 1	11.8	5 ... 43	947 5432 621

## Gear type E

Multi-stage spur gear in zinc diecast body.  
 Grease lubrication for maintenance-free continuous operation.  
 Shaft output with combined sleeve / needle bearing.  
 Reversible direction of rotation.

Yellow	ACTUAL	ACTUAL Speed value
White	A	Input A
Grey	B	Input B
-	C	Not connected
Green	S+	Set value
-	S-	Ground set value
Black	GND	Ground
Rot	+Ub	Supply voltage

# DRIVECONTROL

## VT-A series

Operating electronics for driving 3-phase motors of the VARIODRIVE series. Simple OEM electronics for use in series applications. The DRIVECONTROL VT-A is available in 4 different performance levels for speed-controlled or voltage-controlled operation. Only one supply voltage is required for motor and electronics.

### Nominal Data

Data	Unit	Voltage controlled	Speed controlled
Nominal voltage	V	24	24
Nominal voltage Range	V	10 ... 30	14 ... 28
Max. output voltage	V	UB - 2 V	UB - 2 V
Output current, peak	A	2 - 5	2 - 5
Set value input	V DC	0 ... 10	0 ... 10
Speed control range	min <sup>-1</sup>	–	300 ... 4 000 / 300 ... 10 000
Speed control	Type	–	P
ACTUAL speed value		–	yes
Operating temperature range	°C	0 ... 40 °C	0 ... 40 °C
Temperature monitoring		no	no
Mass	kg	0.2	0.2
Protection class		IP 00	IP 00

MOLEX-Plug

AMP-Plug

### Functions and performance features

- 1 quadrant controller. Positive set value alterations are adjusted by acceleration. Negative set value alterations cause short-circuit braking via the motor winding (increase in intermediate circuit voltage possible!).
- Speed setting via set value input (interface 0...10 V DC).
- Setting of operating modes via 2 control inputs.
- Speed-controlled version with evaluation of Hall signals for ACTUAL speed value monitoring via MF-pin.
- With voltage-controlled (= uncontrolled) version, no braking function and ACTUAL speed value monitoring.
- Fixed limits for current and voltage.
- Voltage supply with input filter, filtering and generation of auxiliary voltage.
- Equipped with PCB plug or Molex plug depending on type of motor.

### Pin connection

### Plug S2

Pin	Type MOLEX	Type AMP
1	GND	MF-Pin
2	A	B
3	ncommand	A
4	+U <sub>B</sub>	ncommand
5	B	Gnd
6	MF-Pin	+U <sub>B</sub>

### Plug S1

Pin	Type MOLEX	Type AMP
1	L 3	+U <sub>Hall</sub>
2	+U <sub>Hall</sub>	Gnd <sub>Hall</sub>
3	RLG 2	RLG 3
4	RLG 1	RLG 2
5	L 2	RLG 1
6	L 1	L 3
7	Gnd <sub>Hall</sub>	L 2
8	RLG 3	L 1

### Voltage controlled version

Typical wiring of the reference input with the voltage controlled version. Special features are described in the relevant data sheets.

### 1. Control inputs

#### Speed controlled Version

A	B		A	
0	0	Power stage disabled	0	Counterclockwise rotation
0	1	Counterclockwise rotation	1	Clockwise rotation
1	0	Clockwise rotation		Input B is not connected
1	1	Brake function*		

low (0)      0 ... 0.8 V  
high (1)     2.4 ... 30 V

\* Brake function:

The braking function serves to slow down the motor only. It has no holding brake function for the static duty.

### 2. Actual speed value output (MF-Pin)

Only with speed-controlled version, open collector that transmits a short pulse at every flange edge of the motor Hall signals!

The illustrated signal sequence for standard assembly is the speed value output.

Voltage range U <sub>CE</sub> :	< 30 V
Max. current I <sub>C</sub> :	10 mA
Pull-up resistor:	> 2000 Ohm by 24 V
Puls length:	150 µs
U <sub>CEsat</sub> :	< 0.8 V

### 3. Set value

The speed selection is normally made externally with a voltage in the range of 0...10 V DC. A voltage of 10 V is equivalent to the maximum speed determined internally.

With the voltage controlled version of the VT-A, the set value is internally fixed at the maximum value. For reducing the set value an external potentiometer can be connected or an external set value voltage can be applied.

### Speed controlled version

The interpretation of the set value and the corresponding level are described in the relevant data sheet.

For detailed information, please refer to the corresponding specification data sheets. The instructions and safety notes in the operating manual must be kept at all times.

# Accessories

## Electrical connection

### Type 194 0010 000

Motor connection cable for VARIODRIVE motors VD-3-35.06 / VD-3-43.10 and DRIVECONTROL VT-A with Molex-plugs.

### Plug A

AMP Duoplug 2.5 - 8-pole grey  
No. : 3-829 868-8 (when encoding)  
Alternative:  
Lumerg 35 21 08K30 (when encoding)

### Type 194 0012 000

Motor connection cable for VARIODRIVE motors VD-3-54.14 and DRIVECONTROL VT-A with Molex-plugs.

### Plug B

Molex 39-01-2085 Mini-Fit, Jr.

### Plug C

AMP-Edge 5 mm - 8-pole  
No. 829 213-8 (when encoding)

### Type 194 0011 000

Electronic connection cable for DRIVECONTROL VT-A with AMP-plugs (motors VD-3-35.06 / VD-3-43.10).

### Plug D (when encoding)

AMP Duoplug 2.5 - 6-pole grey  
No. 3-829 868-6  
or Lumerg 35 21 06K30

**Type 194 0013 000**

Electronic connection cable for DRIVECONTROL VT-A with Molex-plugs (motors VD-3-54.14).

**Plug E**

Molex 39-01-2065 Mini-fit, Jr.

**Type 194 0009 000**

Motor connection cable for VARIODRIVE Compact motors VDC-3-43.10.

**Plug F**

Lumberg Duomodul - connector 2.5 mm 10-pole, Lumberg Order No. 35 15 10 K05 S01

**Type 194 0014 000**

Motor connection cable for VARIODRIVE Compact motors VDC-3-54.14.

**Plug G**

MT-Edge 5 mm - 8 pole natural for 0.5 mm contact with 2 i.p.c.d. Order No. AMP 829 213-8

**Rotor protective cap**

Rotor protective cap made of black polypropylene (PP). The cap is fitted directly onto the motor flange and sealed with a rubber seal.

The protective cap cannot be mounted with motor VDC-3-43.10! When using the protective cap, the motor performance must be reduced due to the decreased heat dissipation from the motor.

	VARIODRIVE VD ... 35.0X 194 3506 000	VARIODRIVE VD ... 43.10 194 4310 000	VARIODRIVE VD ... 54.14 194 5414 000
